

Cornell Tech Startup Activity / 2018

These numbers are based on data from June 2014 – August 2018

These startups have built real products and are actively raising capital from angels, pre-seed investors, and early stage VCs.

51 companies have been founded with 92% in New York City.

\$42.8 million raised across all companies' seed & series A rounds.

248 people have been employed, founders & employees.

31% of companies are currently generating revenue.

5 of the most popular industries are:

IoT Big Data Machine Learning Health Wellness

6 companies have participated in accelerators post Cornell Tech.

2 companies have exited.

⇒ Trigger Finance was acquired by Circle, an established fintech leader in cryptocurrency and blockchain technologies – this is Cornell Tech's first acquisition. The team went through the Startup Ideas course at Cornell Tech, where the idea was originated, and took the startup idea into Startup Studio where it was further developed. Through Startup Awards they won a \$60k award/investment and turned down their top job offers to build the company full time. Trigger built a well-designed mobile app that attracted nearly 40 thousand investors and aggregated over \$340 million+ of AUM on the platform. The team raised angel capital and participated in Morgan Stanley's Innovation Accelerator before being acquired by Circle.
